Mia L. Costner

Ann Arbor, MI | (248) 595-4613 | mialcostner@gmail.com | linkedin.com/in/miacostner | github.com/mmm11122211

SUMMARY

- University of Michigan Bachelor of Science in Information student specializing in data visualization and UX research.
- Hands-on experience using Python for data cleaning and analysis and SQL for querying.
- Experience using Tableau and Power BI to communicate trends and insights.
- Detail-oriented and curious, with experience translating complex data into clear business findings.

EDUCATION

University of Michigan **Expected: May 2027**
Bachelor of Science, Information (BSI) *Ann Arbor, MI*
• **Coursework:** Data Manipulation, Information Architecture, User Modeling, Data-Oriented Programming, Data Exploration, Games & UX, Human-Centered Interaction (HCI)

SKILLS

• **Analytics**: Python (Pandas, NumPy, Matplotlib), SQL, Tableau, Power BI, Streamlit, Data Cleaning
• **Design & Web**: Figma, User Research, Usability Testing, Prototyping, HTML5, CSS3
• **Tools**: Git/GitHub, VS Code, Advanced Microsoft Excel (Pivot Tables, VLOOKUP), Google Colab

PROFESSIONAL EXPERIENCE

Global Career Accelerator **May 2025 - Jul 2025**
Data Analytics Fellow (Externship) *Remote*
• Performed data wrangling and cleaning on complex, mixed-type revenue datasets using Python to ensure data integrity for downstream analysis.
• Developed monthly trend analyses and visualizations to identify peak sales periods and customer behavior patterns.
• Synthesized technical findings into actionable business insights for a final stakeholder presentation.

Michigan Dining (MDining) **Sep 2025 - Present**
Student Team Member (Operations & Logistics) *Ann Arbor, MI*
• Optimizes high-volume workflow logistics in a fast-paced environment, ensuring 100% adherence to health, safety, and operational standards during peak service hours.
• Coordinates with diverse team members to manage inventory turnover and equipment maintenance, reducing operational bottlenecks in the dishroom and food service areas.
• Demonstrates strong time management and reliability while balancing academic rigor with high-demand service shifts.

DTE Energy **Jun 2022 - Aug 2022**
Gas Emissions Research Intern *Detroit, MI*
• Restructured legacy Google Sheets databases to standardize data entry processes, resulting in a significant reduction in manual reporting errors.
• Conducted research on greenhouse gas emissions and renewable energy initiatives, summarizing complex technical data into executive briefs for non-technical leadership.

PROJECTS

Crime Perception vs. Reality Dashboard | Tableau, Python **2025**
• Integrated Pew Research survey data with 20 years of FBI UCR reports to analyze discrepancies between public perception and actual crime statistics.
• Built interactive time-series visualizations to highlight demographic representation gaps, including a 7% versus 19% variance.

Web Analytics Strategy: Recording Academy | Python **2025**
• Evaluated the impact of site architecture changes for Grammy.com and RecordingAcademy.com by analyzing traffic flow and user engagement metrics.
• Utilized bounce-rate and session-duration data to provide data-driven recommendations for improving cross-domain user retention.

Bakery E-Commerce UX Design | Figma, HTML/CSS **2025**
• Designed and prototyped a responsive e-commerce platform, conducting user flow analysis for Menu, Gallery, and Checkout sequences.
• Established a comprehensive design system including typography, color theory, and layout constraints to ensure visual consistency across devices.
