SUMMARY

University of Michigan information student specializing in data visualization and user experience (UX) research. I use Python and SQL to clean and analyze data, and Tableau and Power BI to turn it into findings that business teams can act on. Graduating May 2027 and seeking new grad data analytics and UX research roles and internships.

EDUCATION

University of Michigan **Expected: May 2027**
Bachelor of Science, Information (BSI) | GPA: 3.7/4.0 *Ann Arbor, MI*

- **Coursework:** Data Manipulation, Data-Oriented Programming, Data Exploration, User Modeling, Information Architecture, Human-Centered Interaction (HCI), Games & UX

SKILLS

- **Analytics**: Python (Pandas, NumPy, Matplotlib), SQL, Tableau, Power BI, Streamlit, Data Cleaning, Data Analysis, Data Visualization
- **Design & Web**: Figma, User Research, Usability Testing, Prototyping, HTML5, CSS3
- **Tools**: Git/GitHub, VS Code, Advanced Microsoft Excel (Pivot Tables, VLOOKUP), Google Colab

RELEVANT EXPERIENCE

Global Career Accelerator **May 2025 - Jul 2025**
Data Analytics Fellow (Externship) *Remote*

- Cleaned and wrangled mixed-type revenue datasets in Python, producing reliable data for downstream analysis.
- Built monthly trend analyses and visualizations that identified peak sales periods and customer behavior patterns.
- Presented findings as actionable business insights to stakeholders in a final presentation.

DTE Energy **Jun 2022 - Aug 2022**
Gas Emissions Research Intern *Detroit, MI*

- Restructured legacy Google Sheets databases and standardized data entry, significantly reducing manual reporting errors.
- Researched greenhouse gas emissions and renewable energy initiatives and summarized the findings in executive briefs for non-technical leadership.

ADDITIONAL EXPERIENCE

Michigan Dining (MDining) **Sep 2025 - Present**
Student Team Member (Operations & Logistics) *Ann Arbor, MI*

- Keep high-volume dishroom and food service workflows moving during peak hours while meeting 100% of health, safety, and operational standards.
- Coordinate with a diverse team on inventory turnover and equipment maintenance, reducing operational bottlenecks.
- Balance a demanding course load with regular service shifts.

PROJECTS

Crime Perception vs. Reality Dashboard | Tableau, Python **2025**

- Combined Pew Research survey data with 20 years of FBI UCR reports to measure the gap between public perception of crime and actual crime statistics.
- Built interactive time-series visualizations that expose demographic representation gaps, including a 7% versus 19% variance.

Web Analytics Strategy: Recording Academy | Python **2025**

- Analyzed traffic flow and engagement across Grammy.com and RecordingAcademy.com to evaluate the impact of site architecture changes.
- Used bounce-rate and session-duration data to recommend ways to improve cross-domain user retention.

Bakery E-Commerce UX Design | Figma, HTML/CSS **2025**

- Designed and prototyped a responsive e-commerce site, analyzing user flows for the Menu, Gallery, and Checkout sequences.
- Built a design system covering typography, color theory, and layout constraints to keep the experience consistent across devices.
